

You can use the APart RJ45SPLIT to connect multiple ZONE4R remote control panels and MICPAT-4 four zone paging microphones to the ZONE4, APart's 4-zone stereo pre-amplifier. Connection is easy thanks to the standard RJ45 format.

By using one or more RJ45SPLIT hubs, you can connect up to 8 pcs of ZONE4R remote control panels to a single ZONE4 pre-amplifier. You can also use this hub also to connect 4 pcs. of MICPAT-4 selective paging microphones. A smart-bus system arranges the priority (busy-line).

Please note that :

Remote control panels and paging microphones must be plugged into separate RJ45SPLIT units !

ZONE4R, MICPAT-4 and RJ45SPLIT are NOT network compatible and cannot be used in in a computer network.

With APart products, you never have to look for the right accessory: all the extras an installer needs have been thought of and are available from stock. Our products take the stress out of planning an audio system!
